

## Clustering Event Fresh Water Related project 19th March

Lisa Waldenberger,  
University of Natural Resources and Life Sciences, Vienna (BOKU)

[FRESHWATERNET.EU](http://FRESHWATERNET.EU)

**Objective:**

“to consolidate recent scientific advances on freshwater ecosystem restoration by identifying factors that drive success and showcasing successful solutions across Europe”.

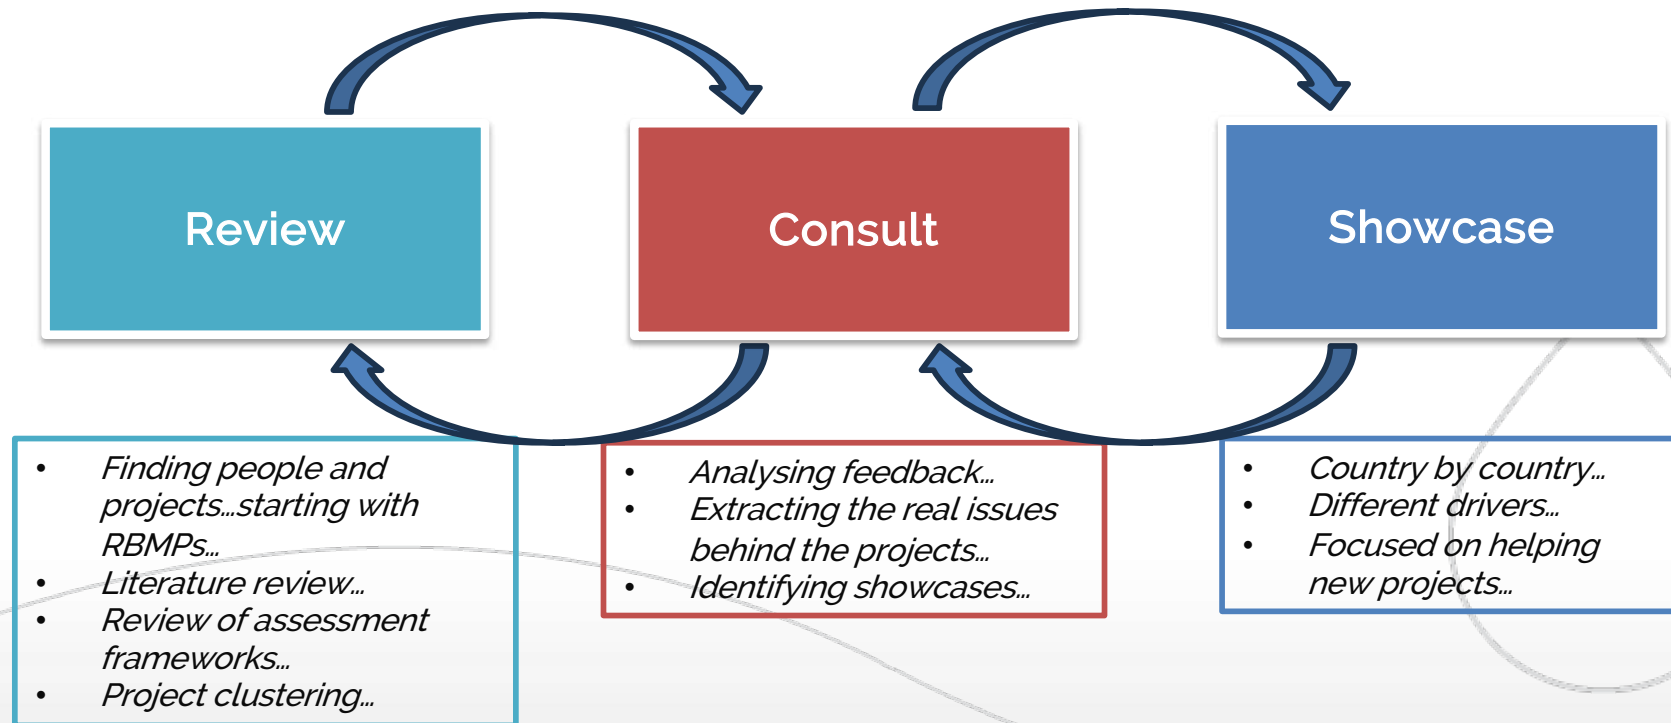

What are the innovative approaches and consolidated knowledge on successful freshwater restoration?

What key factors make a restoration project successful?

What successes can be duplicated elsewhere?

How can efforts be prioritized to ensure that resources are well spent?

[FRESHWATERNET.EU](http://FRESHWATERNET.EU)

We are focusing on finding people and projects involved in freshwater ecosystem restoration!

- Helping support current leaders, scientists, and decision-makers who face the same challenges
- Helping achieve the political agenda of the EU – Biodiversity Strategy 2030, Nature Restoration Law...
- Answering: will this work? Is it worth the money, time and effort? Is it the right thing to do for our community, our circumstances?

**JOIN US!**

1. Sign in at [www.ecoadvance.eu](http://www.ecoadvance.eu)
2. Recommend freshwater restoration people and projects
3. Give feedback, share information...
4. Suggest clustering / networking / linking of projects
5. Ensure that best practice in your country / region is recognised and represented
6. Give policy recommendations to ensure the advancement of freshwater restoration
