The Riversaver Schools & Lit(t)eracy is a continuation of the 5 countries 1 river Erasmus+ project that was implemented in the Tisza River Basin. The project's goal is to adapt best practices from around the world, such as the Ocean Literacy principles, to educate and raise awareness among the public about river and plastic pollution. The aim is to cultivate a new generation of individuals who are literate in these matters and are actively engaged in combating plastic pollution in their local communities.

We look for cooperative partners:

- in the educational sector,
- schools and teachers interested in the Lit(t)eracy concept,
- among NGOs or initiatives dealing with river pollution.
